 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 							
2. This REPORT con	nsists of a total of _	4	sheets, including	this cover sheet.			
3. This report is also	accompanied by Al	NNEXES, comprising:					
a. (sent to	o the applicant and	to the International But	reau) a total of	sheets, as follows:			
	•		•	mended and are the basis for this report and/or			
	heets containing red nstructions).	currications authorized b	y this Authority (see Rul	le 70.16 and Section 607 of the Administrative			
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental							
Box.							
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))							
		111.6		, containing a sequence listing and/or tables			
		readable form only, as rative Instructions).	indicated in the Supplei	mental Box Relating to Sequence Listing (see			
4. This report contain	ns indications relati	ng to the following item	ıs:				
Box No. I	Basis of the	report					
Box No. II	I Priority						
Box No. II	II Non-establi	shment of opinion with	regard to novelty, inventi	ive step and industrial applicability			
Box No. I'	V Lack of unit	ty of invention					
Box No. V	Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
Box No. V	/I Certain doc	uments cited					
Box No. V	Box No. VII Certain defects in the international application						
Box No. VIII Certain observations on the international application							
Date of submission of the demand			Date of completion of thi	is report

PCT/EP2004/007568

reaction described in D1 by the use of a silane which contains isocyanate groups. Since it would not be obvious for a person skilled in the relevant technical field to use a silane which contains isocyanate groups in a reaction with a thermoplastic polyurethane, the subject matter of claim 6 appears to meet the requirements of PCT Article 33(3) for inventive step.

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;

3.2 Claims 2-10 are dependent on claim 1 and thus also meet the PCT inventive step requirements.
